

SyncEx Collaboration Suite

Suite of JSR168 compliant portlets for your portal

Overview

Organizations are rapidly moving business online through business portals that address customer self-service and support, targeted marketing and sales, employee productivity, channel optimization, and supplier interaction. This excels the need and power of collaboration to business portal.

SyncEx Collaboration Suite from Yash Technologies, Inc. gives users access to collaborative tools (mail, appointments, contacts, and tasks) of collaboration server like Microsoft Exchange or Lotus Domino from within any JSR168 -portal servers, via series of pre-built, pre-tested Java Portlet Specification (JSR 168)-compliant portlets. Integration is simple and secure, mirroring the access privileges granted from within the Exchange/ Domino server. Administrators may choose to keep the familiar specific client interface and features set or customize the look and feel to meet specific requirements. Building these frequently-accessed tools into the portal desktop:

- ❖ Eliminates the need to install full specific clients on every desktop.
- ❖ Can, if desired, give users access to the groupware functions from any browser.
- ❖ Can provide a central location for team collaboration activities.

SyncEx Collaboration Suite

For Microsoft Exchange/ Lotus Domino

YASH has brought SyncEx, a next generation collaboration for your business portals to speed up the process of communication and information sharing across the globe. As workers become more mobile and workgroups expand beyond the company's borders (to include customers, suppliers and partners), groupware functions like those found in portal server and Microsoft Exchange/ Lotus Domino allow people to stay connected, keeping projects on track and increasing productivity. SyncEx Collaboration Suite is comprised of mail, calendar, address book and task portlets that may be purchased individually or as a group.

- ❖ **SyncX Email:** Seamless enterprise-wide emailing capability on the web using Microsoft Exchange/ Lotus Domino.
- ❖ **SyncX Task:** Manage your work, schedule tasks for your team. Capabilities to plan, distribute, and monitor enterprise and individual tasks using Microsoft Exchange/ Lotus Domino.
- ❖ **SyncX Calendar:** seamless portal integration for enterprise-wide calendar collaboration using Microsoft Exchange/ Lotus Domino. Integrate workgroups featured with resource/ event scheduling, group calendar, meeting invitations. Still have your personal calendar managing personal events for you.
- ❖ **SyncX Contact:** An enterprise-wide address book to share among team spread all across the globe. Full-featured tool to maintain personal, shared, group, and global address book.

Benefits

- ❖ Allows implementation of collaborative capabilities in a matter of hours and creates a familiar online work environment with personal, relevant information and services.
- ❖ As collaborative features become decoupled from client interfaces, new opportunities abound to use these resources in new applications and services to efficiently enhance user productivity.
- ❖ Reduces administration and support costs by leveraging existing collaboration and portal servers and offering access via a browser-based portal instead of a desktop client.
- ❖ With e-mail and calendars often functioning as an organization's communication hub, building these functions into the portal desktop ensures increased portal usage.

Choose Portal Server

JSR168 compliant portlets extend portal server's features set with Microsoft Exchange/ Lotus Domino functions.

Well-tested SyncEx Suite works with

- ✓ IBM WebSphere Portal
- ✓ Sun Java System Portal
- ✓ eXo Platform Portal
- ✓ Oracle iAS Portal 10g
- ✓ Tibco PortalBuilder
- ✓ BEA Weblogic Portal
- ✓ Jetspeed Portal
- ✓ Jboss Portal
- ✓ UPortal
- ✓ Vignette Application Portal

SyncEx ?

- ✓ Supports SSL & divergent/various authentication protocols.
- ✓ JSR 168-compliant, full-featured access to mail, calendar, address book and tasks.
- ✓ Portlets can run unaltered (with full client user interface) or administrators can customize to meet specific requirements
- ✓ Use the SyncEx Connector SDK to extract data and build it into composite applications or a service-oriented architecture (SOA).
