Portals without SyncEX
is like
OS without applications

Do you feel -

- your portal platform lacks some key applications and utilities?
- the cost & efforts needed for portal adoption in your organization is very high?

Do you think -

- that your investment on portal deployment for your Enterprise Business is going to be wasted?
- that your stakeholders are not able to utilize your enterprise business portal?
- that your portal is not feature-rich?

SyncEX is an ultimate reply to your questions and developed to meet these enterprise level challenges.

Enterprise Portals are becoming one of the most preferred platforms for today's enterprise applications. These portals require custom-built supporting applications in order to derive maximum benefits from the portal deployment and gain wider acceptance across the organization.

SyncEX brings the best solutions at the best offerings, ensuring the right solutions to meet your Enterprise Portal's specific requirements. SyncEX PortletsToGo is a catalog of JSR-168 compliant, pre-tested and pre-packaged ever growing library of portlets that makes your portal an instant success. The portlets range from collaboration and employee productivity to social networking and application integration.

SyncEX **PortletsToGo** empowers your Enterprise portal by providing the best components that you can readily integrate and need not to be built. SyncEX with its component-based approach cuts your development cost and consulting hours to a large extent by helping you compose your portal dynamically.

SyncEX **PortletsToGo** ensures you high performance. JSR-168 compliant portlets from SyncEX PortletsToGo are designed to comprehensively meet your enterprise level day-to-day needs. Being JSR-168 compliant, you will never be on the vendor lock-in risk.
